NOTES

Untuk membuat grup harus Register dan Login dulu. Yang bisa menghapus, memodify, add member, dan delete member hanya "Founder" (yang membuat grup). Setiap user dapat mengakses grup yang dia buat ataupun yang dimana ada user tsb sebagai member. User tidak dapat mengakses grup yang tidak bersangkutan dengan user tersebut.

API testing menggunakan POSTMAN

User dan password yang bisa access database mongoDB:

> User: kelompok9
>
> Password: eGGxrIXSXm6Jdcah
>
> URI: "mongodb+srv://kelompok9:<password>@cluster0.2gqks.mongodb.net/?retryWrites= true&w=majority"

Jangan lupa ganti <password> dengan password

Development framework utama pake NodeJS, Express.

Buat coba server install Node js nya dulu.

API untuk Tasks dan Journeys masih otw.
